Sahara Strategy Session

Attachments Sahara Strategy Session

Meeting records Transcript

Summary

Julian Bradley and Alessandro De La Torre updated the group on product progress, with Julian Bradley noting a legal matter respondent has not accepted service and Alessandro De La Torre confirming visual issues are addressed and the voice feature works; key features discussed include fixing the login, implementing Ira's user journey suggestion for automatic checks, and deciding not to add payment yet as Fred Cary indicated they are not ready. The participants planned for a launch focused on Alessandro De La Torre's joins.com version, with Fred Cary emphasizing that the platform, branded as Sahara, must offer "co-founder level intelligence" and a "guided venture journey" that systematically guides founders through stages like Clarity and Validation, avoiding the ability to skip ahead. Fred Cary outlined core features such as the "founder memory layer," a "chat or call with Fred" function, and a "founder mindset monitor," while Julian Bradley confirmed they have the capability for daily text guidance but need to integrate Twilio, and Alessandro De La Torre confirmed the platform can integrate Bordy's API for VC introductions, though Fred Cary was hesitant to launch paid services until Julian Bradley's full version, including document upload for pitch deck review, is ready.

Details

- **Legal and Technical Updates**: The discussion started with Julian Bradley noting that the person in the lawsuit has not responded to being served and is declining

to accept service (00:00:00). Subsequently, Alessandro De La Torre updated the group on product progress, noting that visual issues from previous meetings have been addressed, and the phone version of the product is also visually improved. They also confirmed that the voice feature, which Ira had checked, is functioning well (00:02:31).

- **Structuring the User Journey**: The current structure of the user journey implements Ira's suggestion where "Fred" automatically checks the boxes and assigns a rating, meaning the user does not have to manually input these checks. The login feature has been fixed, and there is a login button available for returning users. Alessandro De La Torre asked Fred Cary if they should add a payment link, but Fred Cary indicated they are not ready for payments yet (00:03:14).
- **Launch Strategy and Tool Readiness**: The group discussed the immediate launch plan, focusing on whether the full version Julian Bradley is developing will be ready by Tuesday, or if the version built by Alessandro De La Torre (on joins.com) will suffice (00:04:52). Julian Bradley expressed confidence that their version "should be ready by Tuesday" but noted that testing with different user goals and experiences should be conducted. Fred Cary suggested they would go live with the version Alessandro De La Torre built, but emphasized that the experience must feel like the user has "gained a co-founder level intelligence layer or a mentor level intelligence layer" rather than just a tool (00:05:46).
- **Philosophical Approach to the User Experience**: Fred Cary stressed that the tool must philosophically feel like entering a "guided venture journey" rather than opening a chat box. The goal is for the user to feel supported by experienced and knowledgeable guidance that tells them what to do, rather than primarily answering user questions (00:06:43). The core concept is that the AI, branded as Sahara, guides the founder "step by step through the journey of building an invest ready company," targeting the pre-seed and seed stages (00:07:38).
- **Guidance and Execution Support**: The Sahara platform is intended to understand the user's idea, progress, and mindset, providing "structured guides strategic feedback and real execution support". Fred Cary specifically asked if the feature for daily guidance—like sending outward text messages—is set up (00:08:43). Julian Bradley confirmed they have built this capability but need to integrate Twilio (00:09:43).

- **Need for Structured Guidance and Process**: Fred Cary emphasized that the platform should be structured and methodical, avoiding the overwhelming nature of existing platforms (00:09:43). They need the user's initial interaction to feel like a journey, not a transaction, by immediately establishing who the users are building with, thus creating a "founder memory layer" (00:10:33). This structure requires compartmentalizing the process so users cannot skip ahead, such as trying to build a pitch deck before validating the problem (00:12:42).
- **Core Feature Requirements**: Fred Cary outlined several key features, including the "founder memory layer". They highlighted the "chat or call with Fred" feature as a killer feature that should be upfront and must maintain continuity between the text chat and voice call (00:11:41). Other critical features include structured founder guidance, the "reality lens" for testing market demand, and a "founder mindset monitor" to address emotional and physical health when the user seems frustrated or overwhelmed (00:12:42).
- **Daily Guidance and Mentor Approach**: For the "daily guidance" feature (Core Feature six), the platform should present a list of orchestrated, methodical tasks (00:15:37). The platform should act as a mentor by telling the user what they should focus on, such as "validating pricing with five potential customers," rather than asking "what do you need help with today". Julian Bradley raised a concern that consistent outbound text messages for daily guidance could become expensive, suggesting the need for a plan to bring users back onto the platform for responses (00:16:19).
- **Onboarding via Reality Lens Check**: Fred Cary proposed that the initial experience should begin with a "reality lens check" to assess the founder's idea readiness. This would immediately establish where the user is and what needs to be done (00:18:11) (00:20:48). Alessandro De La Torre liked the idea of "spooking them in the onboarding" and agreed that fund matching should be grayed out until the user reaches 100% completion in their journey (00:19:37) (00:22:01).
- **Conciseness of AI Mentor Response**: Fred Cary compared the current Fred AI with their previous GPT Fred, noting that the new version is "more a pain in the ass" because it is less verbose (00:24:52). Alessandro De La Torre explained that the current version is intentionally concise and trained on the same prompt as the GPT version, but with the instruction to limit its explanations to foster a conversation rather than blurring out an essay (00:26:51).

- **Redesigning the Onboarding Flow**: To combat the problem of users feeling overwhelmed and not knowing where to go, the team agreed they are missing a crucial "handholding aspect" at the beginning of the experience (00:28:30). Fred Cary suggested a mandatory educational screen upon first sign-up that explicitly states the platform's purpose, how it works, and that it is a "journey, not a transaction," before letting users interact with Fred (00:40:24).
- **Journey Visualization and Milestones**: Fred Cary proposed using a progress roadmap graphic to visualize the journey and reinforce that the service is not a simple conversation (00:34:31). They introduced the concept of "Oases" as milestones that "matches the Sahara name," creates a story, and makes progress feel like a journey, with the stages being Clarity, Validation, Build, Launch, and Grow (00:37:26). Fred Cary suggested that the journey visualization should be prominently displayed below the chat/call function (00:39:18).
- **Launch Plans and Feature Development**: Alessandro De La Torre suggested an ambitious plan to implement a paywall with a two-week free trial for the 200 founders attending the event (00:43:14). However, Fred Cary was hesitant to launch paid services until Julian Bradley's full version is ready, as they want the paid tier to include the ability to upload and analyze user documents, such as pitch decks. Julian Bradley confirmed that file upload is possible (00:43:41) (00:46:58).
- **Deck Review and Investor Readiness Feature**: Fred Cary demonstrated a previous version of the AI's capability to review a pitch deck, scoring it on elements like problem clarity, market size, and overall investability, then providing feedback on what VCs want to see (00:46:58). This review capability, which also suggests improvements and even creates a new investor-grade deck, is considered a critical piece at the end of the user journey (00:48:46) (00:51:53). Alessandro De La Torre confirmed that the platform can integrate with Bordy's API, which would allow the AI to make direct introductions to VCs and angels, making the integration scalable (00:52:55).

Suggested next steps

- [ ] Fred Cary will determine the content for three or four slides to be used for the QR code and share the presentation slides with the group for input.

- [ ] Alessandro De La Torre will refine the onboarding process to include a 'helping hand' aspect, an onboarding message with instructions, and a progress road map graphic.

Sahara Strategy Session - Transcript

00:00:00

Fred Cary: Hello. Hey, how you doing? Nice. You having lunch? See who this unconfirmed user is. Alex is going to be right here. Let me text him. Hey, before Alex. Never mind. Go ahead.
Julian Bradley: You're saying before Alex comes.
Fred Cary: Um,
Julian Bradley: Uh
Fred Cary: has has the guy responded to
Julian Bradley: uh no no he has not.
Fred Cary: lawsuit.
Julian Bradley: We tried to serve him again but uh he's declining to accept. So
Fred Cary: I think you can have once a lawsuit is filed. Hold on. There's an abbreviated way to do it. Oh, Alex says he's in the waiting room. Let's
Julian Bradley: How you doing?
Fred Cary: see.
Julian Bradley: Hey. Oh, yeah. Right. Uhhuh. I was there last
Alessandro De La Torre: Morning, Fred.
Julian Bradley: weekend.
Alessandro De La Torre: I mean, well, I guess it's afternoon. It's afternoon, technically.
Fred Cary: Alex
Alessandro De La Torre: How's it going?

00:02:31

Alessandro De La Torre: Just so you know, yeah, I just I guess you didn't see all the updates. Uh the ones we were doing live on our meeting with Ira.
Julian Bradley: Heat.
Alessandro De La Torre: That's when we went through all like the the kinks in the road. So, if you type in new message, you know that all the the f***** up visuals is just the past. So if you type in the future, anything else should be cleaned up in terms of like the

the prettiness of it.
Fred Cary: Okay.
Julian Bradley: Heat.
Alessandro De La Torre: And then also if you check your uh phone version, it looks nicer there too. We fixed the Ira complain about there's like a little bordering issue. Fix that. Um and you know,
Fred Cary: Yeah.
Alessandro De La Torre: we double check the the voice thing. Ira checked it. Looks good. The only thing that's up in there, Fred, is um how we want to structure the journey.

00:03:14

Alessandro De La Torre: The journey right now is structured the way that Iris said it where um Fred checks the checks like checks all the boxes for you and gives you a rating. You don't manually do anything.
Julian Bradley: That's cool.
Alessandro De La Torre: It's up to you kind of like combating not combating but like having a you know combative conversation with Fred to kind of prove your point, you know. So those p those are all kinkedked out.
Fred Cary: Yeah.
Alessandro De La Torre: Um the login we fixed that already. So there's a there's a login button in there so you know people can come back, right?
Julian Bradley: Hopefully
Alessandro De La Torre: Um so that's fixy and uh yeah the only thing we're missing is if you want me to add a payment link in
Julian Bradley: not.
Alessandro De La Torre: there.
Fred Cary: Um, I don't think we'll do payments yet. Um, wait, let me put this up
Alessandro De La Torre: Okay.
Fred Cary: here. Uh, are you guys able to see the document I did?

00:04:04

Alessandro De La Torre: Yeah. Yes.
Fred Cary: Uh I I I think you know the one thing I'll just kind of talk on a philosophical uh

level rather than like this should be here and that should be there.
Alessandro De La Torre: Okay.
Fred Cary: I mean um so it really needs to feel like what I'm saying here like like a
Julian Bradley: Is our note taker in here?
Fred Cary: journey.
Alessandro De La Torre: Yeah,
Julian Bradley: Is anyone's not taker in here?
Alessandro De La Torre: there there's three. We got three. Two fireflies and a Gemini. Good.
Julian Bradley: Is mine in here? I can't see it.
Alessandro De La Torre: I can double check right now. Yours is
Julian Bradley: Okay,
Alessandro De La Torre: not.
Julian Bradley: I'll invite it. Um,
Alessandro De La Torre: So, Fred, what I can do,
Julian Bradley: no problem.
Alessandro De La Torre: and I think that the easiest thing for you,
Fred Cary: Yeah.
Alessandro De La Torre: Fred,
Julian Bradley: Heat.

00:04:52

Alessandro De La Torre: is honestly just so we can get everything out there, just tell us what you're going to present,
Julian Bradley: Heat.
Alessandro De La Torre: and then what I'll do is I'll make it. You know what I mean? like you you can sell the like you're gonna tell me the cart right now and I'm I'm literally like making a
Fred Cary: Yeah.
Alessandro De La Torre: making a horse as we speak. So yeah and we can do it with the technology today.
Fred Cary: Okay. All right. So,
Alessandro De La Torre: So
Fred Cary: okay. I mean, I think I think the first overriding question is is the full version that Julian have been doing is how close is that to being done? Is it something we want to risk launching with on Tuesday? If not, is what you've built that's on you. Joins.com, is

that going to be sufficient to give us the experience uh that we really want to be able to portray? So, uh I guess we can start with

00:05:46

Julian Bradley: I think I think It it should be ready by Tuesday for sure.
Fred Cary: Julian.
Julian Bradley: Um but I think we should also um do testing on it with different um different goals and you know experiences that you want to the user to be able to
Fred Cary: So,
Julian Bradley: experience.
Fred Cary: so we'll go live with what Alex built, but we just gota I mean, here's what it's got to feel like, right? It should not feel like here's a tool.
Julian Bradley: Mhm.
Fred Cary: Uh, it should feel like you've just gained a co-founder level intelligence layer or a mentor level intelligence layer, right? Uh, we'll have a QR code for people of three or four slides.
Julian Bradley: Yeah.
Fred Cary: I'll work with with my GPT to help help say what those slides should be and then Alex
Julian Bradley: Heat.
Fred Cary: if you can make it. But um you know this
Alessandro De La Torre: Yeah, actually Fred, I know I don't know what the hell is happening with the current deck,
Fred Cary: is
Julian Bradley: Heat.
Alessandro De La Torre: but if this is the content you want in the in the deck to be, just share with me and bada boom.

00:06:43

Fred Cary: Yeah. But no, I I want everybody because you guys are the builders and I want you to understand philosophically, you know, what I intfully uh try to express here as to what this has to be different then, right? This is like you're entering into a guided venture journey, not opening a chat box. It's got to be like you come in and all of a sudden, f***,

I'm not all alone in the middle of the desert anymore. I got somebody really experienced, really knowledgeable that's not only uh going to be there so I can ask questions. I'm not going to ask any f*** f****** questions. It's going to tell me what to do. I may ask a question if I don't understand, but it's going to guide me. Look at what I'm doing.
Julian Bradley: That's good.
Fred Cary: Look at who I am. Figure out whether I'm stressed or not, help me out internally as well as helping build this company together.
Julian Bradley: Wonderful.
Fred Cary: Right? So uh you know basically the whole AI venture studio

00:07:38

Julian Bradley: All
Fred Cary: 247 founder intelligence right so here's the core concept right instead of leaving founders to navigate the chaos of building a startup alone Sahara guides you step by step through the journey of building an investor company that's that's really important Sahara guides you step by step through the journey of
Julian Bradley: right.
Fred Cary: building an invest ready company. I think I would add to that. No matter where you are, uh,
Julian Bradley: Thank you.
Alessandro De La Torre: But but to be clear,
Fred Cary: it understands your Yeah.
Alessandro De La Torre: specifically precede series
Fred Cary: Well, preede and seed, I would not even do series 8. I would, you know, friends and family preede and seed. Series A is going to be a different thing. Series 8, Ser A, they've already made, they've already made uh or had successful investments. They've already built a product. they already have customers. We'll have to build out something a little different for them. So, I think I think we just say, you know, this first version and everybody in the room and everybody that's on our waiting list is in this position.

00:08:43

Fred Cary: We have an idea or we just built a company. We need to raise our first capital.

Uh or we've raised a couple hundred thousand, we need to go out and do a more sophisticated route. So, everybody's going to be pretty much in that same level. And then the series A I think it's a whole different mantra that we can launch that in six months down the road
Julian Bradley: Oh my
Fred Cary: doesn't really matter. Um but I think the the important thing is uh well it's all important obviously uh step by step understands right it understands your company or your idea your progress even your mindset providing
Julian Bradley: Goodness.
Fred Cary: structured guides strategic feedback and real execution support. Uh you can chat, speak, brainstorm, pressure test ideas, receive daily guidance. That's one of the thing that I don't know that we have. Do we have that set up yet where we can text outward to
Alessandro De La Torre: Yeah. So, um, we do all right.
Julian Bradley: Oh
Fred Cary: them?

00:09:43

Alessandro De La Torre: Well, as I said, like you know,
Julian Bradley: yeah.
Alessandro De La Torre: infra Julian does and then I just have like a expedited version of that. Yeah. Actually,
Fred Cary: Okay.
Julian Bradley: Yeah, we do. We built that actually.
Fred Cary: Okay.
Julian Bradley: We just need to get the Twilio integrations um
Alessandro De La Torre: Julian,
Fred Cary: Right.
Alessandro De La Torre: do you think you could just use Firebase's native SMS function instead of Twilio?
Julian Bradley: to
Alessandro De La Torre: What do you think?
Julian Bradley: um I mean it's in super
Alessandro De La Torre: Oh,
Julian Bradley: base.
Alessandro De La Torre: okay.

Fred Cary: So that that's one thing, you know, the even with this Gregory's uh company,
Julian Bradley: Yeah.
Fred Cary: Startup Science, uh you go in there and you're just f****** overwhelmed. there's s*** every everywhere. You know,
Julian Bradley: There's
Fred Cary: I would like to see people come on and basically are you ready to start your journey? Uh and then boom, here's the first step.

00:10:33

Fred Cary: You know, tell me this, tell me that and guided the whole way and let people know right from the very beginning.
Julian Bradley: no
Fred Cary: You're not contacting me to ask me a question. You're contacting me to build a company, you know. So basically what I wrote here or what AI Fred wrote it's got to feel like a
Julian Bradley: Heat.
Fred Cary: journey as soon as you get on there not a not a transaction right so what it's
Julian Bradley: Heat.
Fred Cary: saying most AI tools prompt response end Sahara's got to feel like founder journey continuous guidance progress evolution right every interaction should reinforce Sahara knows who you are they know knows what you're building remembers your past decision is guiding your next move um you know now I have a venture mentor living inside my startup and the launch features um we don't need everything of course we the it must signal depth uh right away you know this is more than just a little tool to play around with that's right when somebody enters
Julian Bradley: Stop. Stop.

00:11:41

Fred Cary: immediately establish who they are building with examples startup idea stage market co-founder biggest challenge and that creates the founder memory layer and
Julian Bradley: sounds.
Fred Cary: everything to follow should reference that since you're building a client

fintech company at validation stage right that's magic the second core feature which I think is f****** phenomenal it's already one of our killer features really highlight it right up front chat or call with with Fred your mentor Fred or whatever you know your AI mentor anytime it should
Julian Bradley: Let's
Fred Cary: be clear up there that they can they can do that you can Start and chat. You can switch to voice and Sarah remembers the entire conversation. Example moment.
Julian Bradley: go.
Fred Cary: Founders chatting about pricing strategy and the founder taps call Fred. Fred answers. Let's continue the pricing conversation we're just having. That's really powerful. And that already works. So that gives me boner. I I I do that just before I run into the bedroom to my girlfriend.
Alessandro De La Torre: Oh yeah, you just talk you just chat with Fred really quick.

00:12:42

Fred Cary: Um,
Alessandro De La Torre: Hey, you remember what I said yesterday? Yes. f*** yeah. And then you just Yep.
Fred Cary: let's go f*****. All right, then. Core major three, the structured founder guidance, right? We can't have a f****** open-ended chat. And one of the things that that it was doing like a week ago,
Julian Bradley: Heat.
Fred Cary: it would carry on on a sub subject like for f****** ever, right?
Julian Bradley: Heat.
Fred Cary: And it would allow you to kind of skip, you know, hey, I'm just starting. I got I got a a raw idea and I want to learn how to build a pitch deck. Uh well, you know, you're not f****** anywhere near ready to build a pitch deck, right? So, it's gota it's got to compartmentalize things so there's a process and people can't jump ahead of of the journey line to get to the end before they go through the other parts, right? So it should be like validate the problem, test market demand, define positioning,

00:13:36

Julian Bradley: What's

Fred Cary: prepare investor readiness.
Julian Bradley: this?
Fred Cary: Um so each step should reinforce the venture studio identity. Right? Then the core feature four is reality lens.
Julian Bradley: All
Fred Cary: Um we already have this concept startup reality lens. Let's test whether your idea has real market demand. Founder answers five or six question. We get an analysis. And I want to come back to that one because I think when we launch there may be a good way
Julian Bradley: right. Heat.
Fred Cary: that we can do this even even if it's temporary. Uh core feature five the founder month a mindset monitor mon monitoring this is huge
Julian Bradley: Heat.
Fred Cary: differentiator founder messages repeatedly at night. Sahara says you seem frustrated about this problem. Let's slow down unpack what's actually happening. Right. We we need to be able to train Fred to feel the energy if there's a phone call like the types of questions or if there's a chat the types of questions you know I keep stumbling over this it's keeping me up at night and the dialogue should be changing to that person's mental emotional and physical health at that point u the Fred the Chad GBT version that I had built did that really well when I I suggested I'd been up till 3:00 a.m. uh thinking about a certain thing.

00:14:57

Fred Cary: It literally stopped. It said, "Here's what we're going to do. Put down your folder for the next three days. I want you to do this over the next three days." You know, don't think about business at all.
Julian Bradley: You
Fred Cary: Do this for your health. Take this long walk to gave advice to get you back in sync. And I think we got to make sure that we have that.
Alessandro De La Torre: Do you think not to click offer,
Fred Cary: And then I I I think what else is
Alessandro De La Torre: but do you think the easiest way to do that would be having vis like visually for
Julian Bradley: need
Alessandro De La Torre: a founder, what would be the easiest thing? Would it just be cuz they have s*** to do, right? And they're going to get overwhelmed. They're going to

be like, "f***, I have to do a pitch deck and design and everything and reach found." How about we just have on the

00:15:37

Alessandro De La Torre: homepage, they just have one thing that they need to do every day. Would that be easier or would you think that's dumbing it down too much?
Fred Cary: No, I I think they they need I think they need a list of what they need to do, right? This has to be very very orchestrated,
Alessandro De La Torre: Yeah.
Fred Cary: very methodical. Uh Julian, today I want you to accomplish these three things.
Julian Bradley: Heat.
Fred Cary: Do you think you can handle them?
Julian Bradley: Heat.
Fred Cary: No, no. I don't know if I can get through all three of them. All right,
Alessandro De La Torre: It's
Fred Cary: pick two. Which two are you going to go with first? And then, you know, next morning they get a text from us.
Alessandro De La Torre: clear.
Fred Cary: Jillian, did you get did you get those things done? If so, let's let's go back and talk about the next steps, you know. So, so yeah, bite bite-sized pieces theoretically or

00:16:19

Julian Bradley: So, on the text part,
Fred Cary: philosophic
Julian Bradley: um, yeah, I guess we just have to figure out that part. Um I think if we're going to have consistent messages going out um that can get expensive and I think uh what what we should do
Alessandro De La Torre: Yeah, I
Fred Cary: Yeah.
Alessandro De La Torre: already
Julian Bradley: is you know think about how the next phase which is creating the app to be able to bring them back onto the platform and respond on those text messages

because you're going to run up a bill pretty quickly. Um all these micro interactions and and you know
Fred Cary: Well, let's let's why don't we just set it up as as their dashboard.
Julian Bradley: reminders
Fred Cary: There's a different thing on the top of the dashboard like here this core feature number six daily guidance right this is what turns Sahara into mentor example every time they log in if they log in they hopefully most people be in logged in but every time they come back into the system and it's a new day you know today's focus example your next step is validating pricing with five potential customers not ask me anything right it needs to be guided guided momentum

00:17:28

Julian Bradley: What was
Fred Cary: them.
Alessandro De La Torre: Okay. So,
Julian Bradley: that?
Alessandro De La Torre: it'll never ask what do you need help with today.
Fred Cary: Um,
Alessandro De La Torre: It's going to tell you you need you need help with this today.
Fred Cary: yeah,
Alessandro De La Torre: Okay.
Fred Cary: it's going to be your mentor and it's not going to be your agent. You know, you don't know what the f*** you're doing.
Alessandro De La Torre: Yeah.
Fred Cary: We know what you should be doing. We're going to be telling you. Uh,
Julian Bradley: Let's
Alessandro De La Torre: You can
Fred Cary: and you can always say, "Look, if you have any problem or anything, call me right now and let's talk about your problem." And and so the the whole chat thing and the website
Alessandro De La Torre: always
Fred Cary: and everything should be really structured, organized, and hopefully be able to review content, create content, store content.
Julian Bradley: go.
Alessandro De La Torre: Yeah.
Fred Cary: That's really where it needs to go.

00:18:11

Fred Cary: Um the the the one thing that I was thinking of since everybody that's going to be there is uh going to uh have a deck and they're all like 10 or 12 of them are going to be presenting, but there's going to be about 200 founders there um that are ready with their decks and they're there because they're they want to see what everybody else is doing and see how to raise
Julian Bradley: It's
Alessandro De La Torre: Oh,
Fred Cary: capital. So, if maybe it even starts with this kind of reality lens,
Alessandro De La Torre: okay.
Julian Bradley: nice.
Fred Cary: uh let's see what you got, where you're going, where you think you are, and whether or not we can get you to where you got to go. Like, you know, this thing instead of instead of Let
Alessandro De La Torre: Okay.
Fred Cary: me stop sharing for a second. Instead of what we have now, let me pull it up.
Julian Bradley: I got it.
Fred Cary: Where is it? I'm going to pull it up now. Here, I'll share this blank screen.

00:19:37

Fred Cary: We'll go here. We'll go here. We'll share this one for now. Let me go to the page. Where the f***? I'm gonna I'm gonna I'm gonna do it.
Julian Bradley: I'm
Fred Cary: I'm going to clean I'm going to share this one. Okay.
Julian Bradley: Oh,
Fred Cary: Now you doing sahahahahahahahahahahahahahahahahahahahahahahahahahahahahahahahahahahahahahahahahahahahara.com. Okay. right here. I I think maybe the first thing should be a reality lens check, right? Instead of I don't I don't know that we need all all these things.
Julian Bradley: nice.
Fred Cary: Um I I
Alessandro De La Torre: I like that idea. So you want to do like a I scare them.

Fred Cary: think
Alessandro De La Torre: So you know spook them, right? Spook them in the onboarding. Okay.
Fred Cary: Yeah. and and you know maybe maybe on this left side it's just like hey whether you're starting out building an MVP whe you have traction and scaling right forget the series A piece uh then click click over here and do the reality lens

00:20:48

Julian Bradley: What?
Fred Cary: right and I think we have that see here I'll add my daughter
Julian Bradley: What the
Fred Cary: Okay. So now where is this thing? This thing here like maybe we have something that's like this but it's this kind of reality lens here. This thing the idea res readiness score right like let's tell you where you are right now. This doesn't work does it?
Alessandro De La Torre: Uh, it updates every 24 hours after you chat with Fred.
Fred Cary: It doesn't do anything.
Alessandro De La Torre: That's how it works now, obviously. Yeah, I think you can probably think of a better idea that it works. Maybe you can bump it up to the top and a little more detail, right?
Fred Cary: Yeah. Something this one here, you know
Julian Bradley: Maybe a manual refresh instead of uh 24
Fred Cary: me.
Julian Bradley: hours.
Alessandro De La Torre: There is one too.
Julian Bradley: Uh maybe like a manual refresh.
Alessandro De La Torre: If you scroll down on that page, Fred, there's like a blue check it button right there.

00:22:01

Fred Cary: Um
Alessandro De La Torre: Review my progress. And then if you click it, it essentially goes through what you've done. Obviously, you know, no change because you didn't chat with

Fred yet.
Fred Cary: and say fund matching shouldn't be up there like right away. uh you know because and this is this is just you know tip of
Alessandro De La Torre: Okay.
Fred Cary: an iceberg on on funds uh I'm actually speaking with a guy on Monday who's built something that might be really good for us on matching with with funds like thousands of funds we might be able to integrate it into what we're doing but right now I think that fund matching maybe gets grayed out until you fund matching once you receive once you get to 100%.
Alessandro De La Torre: Thank you.
Fred Cary: Uh or something. U but here when you first when you first go on to Sahara this is the first thing this is the first thing you see like after you log in right now that's
Alessandro De La Torre: Brilliant.

00:23:11

Fred Cary: not you know not so sexy.
Alessandro De La Torre: Take
Julian Bradley: That's
Alessandro De La Torre: some
Fred Cary: Um, so let's start Fred and see what happens real fast. You think you have a good here's what I learned that can soon fall in love with sushi.
Alessandro De La Torre: message.
Fred Cary: How many people have you talked to who have this pain?
Julian Bradley: Heat.
Fred Cary: Not friends of family strange don't like see we haven't even asked like what it is they have or whether they let me see I hope Fred does my GBT version of this could answer this one well.
Julian Bradley: Heat.
Fred Cary: Oh,
Julian Bradley: I can't
Fred Cary: see real Fred's better.
Julian Bradley: see.
Fred Cary: I mean, not real Fred, the the old Fred is better than that. Uh because it we go into start talking about, okay, how long have you been passionate? It's great. Do you want to do something? It's fine. You don't know what you want to do. Let's let's work together here on this.

00:24:52

Fred Cary: What are some of the things that you're really passionate about? You know, uh here, let me ask him again. I do not have a business idea yet. I just have a desire and passion to create something. Can you
Julian Bradley: Come on. Heat. Heat.
Fred Cary: Yeah, Fred. This Fred's more a pain in the ass than a old kinder, gentler Fred.
Alessandro De La Torre: Yeah, this one's meaner. The the big difference between your GPT Fred is your GPT
Fred Cary: Um,
Alessandro De La Torre: Fred says a lot, right? It it kind of gives you like a whole like spiel every time you ask it something. And yeah,
Fred Cary: yeah, it says too much.
Alessandro De La Torre: so that's what this thread is trying not to do. It's trying to ask you. It's it's trying to baby step the process,
Julian Bradley: Wait,
Alessandro De La Torre: but obviously if you baby step it, you sacrifice, you know, the intricacy of det right the detail.

00:26:51

Alessandro De La Torre: So it is a trade-off,
Fred Cary: If I give you if I this all this all works on the the
Alessandro De La Torre: but
Fred Cary: internal prompts and guidance you give it,
Alessandro De La Torre: correct.
Fred Cary: right?
Julian Bradley: that's the
Alessandro De La Torre: And it's actually trained.
Fred Cary: All right.
Alessandro De La Torre: So Fred is actually trained on the exact same prompt that Yeah, it's actually trained on the exact same prompt that your GPT one is.
Julian Bradley: Heat.
Alessandro De La Torre: However, the only difference is it's told to keep its um

explanations more concise because it understands it's not a GPT where it can just like blur out an essay. It h it knows it has to have a conversation.
Julian Bradley: Heat.
Alessandro De La Torre: currently your Fred GBT in the in the way you like created it,
Fred Cary: Yeah.
Alessandro De La Torre: it has no obligation to have a conversation with the user. It feels like it can just say everything it need the person needs, you know?

00:27:39

Alessandro De La Torre: So that's that's the big difference. So if you're kind of wondering,
Fred Cary: Yeah.
Alessandro De La Torre: if you're kind of racking your brain like how the f*** are they two so different, it's really just that that's the one thing that's different between the GPT Fred and the joint UDA joins of hair Fred is GPT Fred has no need. it it feels like it has no need to be concise. That's why that's why it'll kind of give you a whole spiel. But on the um USA Fred, it feels it needs to be concise. That's the big difference. But it's the exact same fun like brain like quoteunquote brain function.
Fred Cary: Yeah.
Julian Bradley: Look at
Alessandro De La Torre: It's the exact same.
Fred Cary: Right. So this in this thing here you either you either have your dialogue or you have your progress, right? or you have you, which is just your basically your data, your contact data and everything.

00:28:30

Fred Cary: Shouldn't clicking here or something bring you to kind of a
Julian Bradley: Heat.
Alessandro De La Torre: something.
Julian Bradley: Heat.
Fred Cary: homepage and shouldn't we have some instructions on how we use
Alessandro De La Torre: I
Fred Cary: this? Or like, you know,

Alessandro De La Torre: mean,
Fred Cary: if this is like the first time that Fred gives his thing on the chat side of it, shouldn't there be something that says, "Before we get started, let me tell you how this is going to
Alessandro De La Torre: yeah, I agree.
Fred Cary: work.
Alessandro De La Torre: I think the main I think the the big thing that we're missing right now, which obviously I can do in no problem and very fast, but um the big thing we're missing is I don't want it to be a repetition of the the what's his name? Brandon or whatever from startup accelerator.com or whatever his your main gripe with your main gripe with this product is that it's just you dive into the deep end and it's f******
Fred Cary: Yeah.

00:29:19

Alessandro De La Torre: overwhelming, right? And with us, even though it's not as complex, it's a little bit overwhelming because they don't exactly know where to go,
Fred Cary: Yeah.
Alessandro De La Torre: right? Even though they get popped into a chatbot, they're kind of like, "Okay, what's going on?" So,
Julian Bradley: All right,
Fred Cary: Yeah. Okay.
Alessandro De La Torre: do you want to kind of you want to kind of do the same thing where it's like They kind of get told, "Okay, first thing you need to do,
Julian Bradley: baby.
Alessandro De La Torre: talk with Fred and he'll tell you where to go."
Fred Cary: basically. Um,
Alessandro De La Torre: Okay.
Fred Cary: so here let's start. Let me let me go to the old Fred. Um there. Can you see him?
Alessandro De La Torre: Yeah.
Fred Cary: Um
Julian Bradley: You're ready.
Fred Cary: So even something like this in the beginning right and then then how how it works and even an onboarding message progress road map graphic we already have that let me copy

00:31:32

Julian Bradley: Amen.
Fred Cary: this add it to the chat
Julian Bradley: There we go.
Fred Cary: and then let We go back. Uh
Julian Bradley: Take the ball.
Fred Cary: Does that sound
Alessandro De La Torre: Oh yeah,
Fred Cary: good?
Alessandro De La Torre: 100%.
Julian Bradley: Yeah,
Alessandro De La Torre: I really think all the all the kind of holes Yeah,
Julian Bradley: I think that I think that looks good. I think it looks better for sure.
Alessandro De La Torre: I think all the all the holes that you kind of mentioned, Fred,
Fred Cary: Okay.
Alessandro De La Torre: it all just stems from um a lack of like an extra
Julian Bradley: Heat.
Alessandro De La Torre: like we're offering a helping hand, but we have to teach them to grab the hand first, right? Um and I think I think that's just that missing piece.
Fred Cary: Right. And this is what Yeah. And that's what this is. It's basically saying, "All right, this this is what we are. This is what we're going to do." Because nobody's used to this,

00:33:04

Julian Bradley: Heat.
Fred Cary: right? Everything else is a tool. You're prompted.
Alessandro De La Torre: Yeah.
Fred Cary: It gives you answers and then you execute. This is the opposite. And here's a oneline promise to put above the the three steps there. Uh Fred is planning his own funeral.
Alessandro De La Torre: Oh god.
Fred Cary: This is ironic. Okay, then let me go back to it. Uh

Julian Bradley: Heat. Heat.
Fred Cary: Oh, I love this here. This is nice and short and sweet,
Alessandro De La Torre: Oh, beautiful.
Julian Bradley: Heat.
Alessandro De La Torre: Built the path. I like that. Yeah,
Fred Cary: isn't it?
Alessandro De La Torre: I like that,
Julian Bradley: Heat.
Alessandro De La Torre: guys. Gas is f******
Fred Cary: That way people eat beans
Alessandro De La Torre: insane.
Fred Cary: again.
Alessandro De La Torre: No, no. I like I know. Like I was just like calming gas is insane right now.

00:34:31

Fred Cary: And I said, "Did you eat beans again?" You see
Alessandro De La Torre: Oh.
Julian Bradley: All
Alessandro De La Torre: Oh.
Fred Cary: gas.
Julian Bradley: right.
Alessandro De La Torre: I
Fred Cary: We have all this already. We don't need this.
Alessandro De La Torre: did.
Fred Cary: Um,
Alessandro De La Torre: Okay. I I feel like I have a solid direction now of what to do.
Fred Cary: I wanted to I want to ask you one more thing. It said something up here.
Julian Bradley: fast.
Fred Cary: Uh here this one. Do we have the Do we have a graphic a progress road map
Alessandro De La Torre: Uh,
Fred Cary: graphic?
Alessandro De La Torre: obviously we're not graphic. We don't actually. We just have a cute little
Fred Cary: Let's see what it says.
Alessandro De La Torre: checklist.

Fred Cary: That's kind of a clever idea.
Alessandro De La Torre: Okay, let's see it.
Fred Cary: Something show these things. Visualize the fact that this is meant to be a journey, right?

00:37:26

Fred Cary: And is not meant to be a simple conversation.
Alessandro De La Torre: Yeah.
Fred Cary: Uh
Alessandro De La Torre: I I feel like uh you can kind of clue in the Sahara,
Fred Cary: learn
Alessandro De La Torre: you know. We It's called Sahara. We don't have any like desert relation. You can call it like the oasis or something.
Fred Cary: what I just said. Oasis one, Oasis 2, Oasis 3.
Alessandro De La Torre: Oh, okay. That sounds stupid.
Fred Cary: Are you not looking?
Alessandro De La Torre: I didn't zoom in.
Fred Cary: Okay.
Alessandro De La Torre: I would
Fred Cary: So why this framing works having all these oases, right?
Alessandro De La Torre: say
Fred Cary: Why this framing works psychologically it matches the Sahara name it creates a story people remember makes progress feel like a journey not a course and it gives the user milestones instead of just lessons. So we're going to we're going to go we're going to get our clarity together first. Then we're going to do validation stage then build, launch and grow.

00:38:24

Fred Cary: Um, okay. You like much more premium version? Why the f*** not? Fred's like kind of like a used car salesman. It's like I'm gonna give you something, but I got a premium version of your hood.
Alessandro De La Torre: It it always tries to one more thing you Yeah, I noticed that.
Fred Cary: Yeah.

Alessandro De La Torre: And you know it's it's a problem in the in all the Fred versions. I think there's something in your code, Fred,
Fred Cary: Yeah.
Alessandro De La Torre: or like in your human code that's like embedded within it permanently because this has been a problem universally for
Fred Cary: Yeah.
Alessandro De La Torre: us.
Fred Cary: It won't stop. It'll give you this and then it'll say, "Hey, you know, I have this one f****** trick that'll make this bulletproof.
Alessandro De La Torre: It It's I'm gonna be honest,
Fred Cary: Do you want to hear it?
Alessandro De La Torre: Fred. It makes it sound like the MLY fool. I don't know if you know Mley.

00:39:18

Alessandro De La Torre: It makes every single like statement that Fred talks about being like sourced from the mly fool and it just to me sounds insane. I'm like, "Oh my god, I feel like I'm in I feel like I'm watching like a like a financial advisory seminar right now." f*** going to get sold on a time share. Yeah, I know. It keep it keeps doing that. I guess just because the way you talk on the podcast, it creates a bias, right? That that's my assumption.
Fred Cary: Yeah.
Alessandro De La Torre: That's what I
Fred Cary: See, so this would give a a great visual like where you are.
Alessandro De La Torre: say.
Fred Cary: I think I think it should be like kind of on the top it really should be chatter call, right? And then right below that is this journey. It shows you every time you go on where you are in the journey. And I mean ideally you could click on any one of these things and it would it would show those different levels that you already have built out but that's probably too much to to ask for.

00:40:24

Alessandro De La Torre: Yeah, we can we can probably we can play around with

Fred Cary: short period of time.
Alessandro De La Torre: it.
Fred Cary: Okay. No, we don't want it to do that.
Alessandro De La Torre: Oh,
Fred Cary: All right. So that I mean what I think to me the biggest things is immediately when you go on there you know this is something different and it tells you before before you just can play around with it. You know when I go on some of these sites there's just like so many different choices and and our friend
Alessandro De La Torre: Okay.
Fred Cary: Gregory with his is the same. You got courses, you got books, you got classes, you got community, you got all this s*** and you don't know where to go. You don't know what to do and there's no guidance. There's no instruction. If we get people when they first sign up, boom, first screen, it's all about and this screen doesn't have to ever appear again. It's all about us, our purpose, what we're doing, how it's going to work.

00:41:23

Fred Cary: You ready to get started? Yes. Click here. Right. And and so ed we educate before we get them to start just immediately interacting with Fred. This is what we do. This is how it works.
Alessandro De La Torre: Yeah.
Fred Cary: This is a journey, not a transaction. Are you ready to go? Boom. Okay, let's start with where are you? Where are you on your journey? I don't think we need to have all those four different prompts.
Alessandro De La Torre: Yeah. Hey
Fred Cary: I think we just need to say, you know,
Alessandro De La Torre: there.
Fred Cary: where are you on your journey? Uh, and it could parenthesize parenthesy, you know, idea blah blah blah. Um, where the f***
Alessandro De La Torre: Okay.
Fred Cary: is it? Let me pull up your your thing again. And then one of the big things as this grows is going to be the ability to commit your create your own community and invite people to it.

00:42:19

Fred Cary: But we don't need to worry about that yet. We can build that out into V1.5 or when Julian's version's ready to go
Alessandro De La Torre: It's not a Yeah, it's it's not as complicated as you think.
Fred Cary: live.
Alessandro De La Torre: It's it's a week it's a week long
Fred Cary: Okay. Um Okay.
Alessandro De La Torre: project.
Fred Cary: Okay. So, let me go back over to the right
Alessandro De La Torre: Okay.
Fred Cary: screen.
Alessandro De La Torre: So, in terms of actionables, refine the onboarding, do a helping hand. What else?
Fred Cary: Um, I think the last thing is just to decide what we're going to present with. And I'll I'll do that with my AI. I'll come up with what I think a few slides should be and then I'll share it with you guys and you guys give
Alessandro De La Torre: Okay.
Fred Cary: me the input about what you think.
Alessandro De La Torre: Okay.
Fred Cary: Okay. So, we'll have a couple hundred people there.

00:43:14

Fred Cary: We also have uh a waiting
Alessandro De La Torre: I I'm kind of ambitious. I kind of want a pay wall.
Fred Cary: list.
Alessandro De La Torre: I mean, I'm just here. Here's my idea, friend. You can tell me I'm wrong. You know, everyone's there. You're just be like, and you guys can all try it today. And you know what? Since you guys are all here, I'm going to give you guys two weeks free. Just hop on, put in the code that you see on the screen. Everyone's going to be, you know, everyone's going to be like, "Ah, cool, an app." And now that they see, f***, two weeks free on a paid service. They're going to be like, "f***." And then actually, and then reality,
Julian Bradley: Come
Alessandro De La Torre: 14 days later, the subscription kicks in. Most of them are going to either forget, most of them are going to be interested in it,

00:43:41

Julian Bradley: back.
Alessandro De La Torre: and then you'll have some cash flow. automatically, right? And as we improve the
Fred Cary: Yeah,
Alessandro De La Torre: product
Fred Cary: but I don't know that we're going to be ready for that until Julian's done with the whole full thing because I want people I want people to be able to upload their decks or their summaries or
Julian Bradley: I
Fred Cary: whatever written handwritten diary, whatever they have. I want to be able to take it, analyze it as part of the paid part of it. And I don't think we can do that in this version.
Julian Bradley: You can you can do
Fred Cary: Well, let's ask.
Julian Bradley: it.
Fred Cary: Let's find out. Let's go. Let's go talk to the little m**********. Okay. Go over there.
Alessandro De La Torre: I do have to hop off in a little bit,
Fred Cary: Where is he?
Alessandro De La Torre: but I do have a clear I already have a I have a pretty clear direction of what I need to

00:44:38

Fred Cary: Yeah.
Julian Bradley: I'm
Fred Cary: Yeah.
Alessandro De La Torre: do.
Julian Bradley: saying
Fred Cary: Okay,
Alessandro De La Torre: Let me
Fred Cary: let me just let me just try this one thing first and then then we can all go.

Alessandro De La Torre: just
Fred Cary: All right. Where is Where's Sahara? Where'd he go? There it is. Okay. Um,
Alessandro De La Torre: Is
Julian Bradley: That's
Fred Cary: and does this Fred like old Fred would would give you feedback?
Alessandro De La Torre: that
Fred Cary: back like um let's see uh in one sentence when your product or service deck proposes to
Julian Bradley: Oops.
Fred Cary: sell
Alessandro De La Torre: speech?
Fred Cary: um
Alessandro De La Torre: I can't see what you're looking at if you're sharing something.
Fred Cary: Oh,
Alessandro De La Torre: Yeah. All I see is the Sahara.
Fred Cary: really?
Alessandro De La Torre: You touch on Sahara.
Fred Cary: Let me refresh. Well, it doesn't it doesn't it it won't you can't upload any any documents or anything and can't get any review of any documents um in uh obviously in old Sahara one of the things that I built in that let me pull this let me pull this up here and then after this we'll

00:46:58

Alessandro De La Torre: Okay. So,
Julian Bradley: Perfect.
Alessandro De La Torre: Julian, you can add file upload, right?
Julian Bradley: Yeah.
Fred Cary: Let's see.
Alessandro De La Torre: Okay.
Fred Cary: Let me go open up the chat. Let me pull Fred up. Okay. Can you see my chat.
Alessandro De La Torre: Yep. Why this is powerful?
Fred Cary: Okay. Yeah. I just want to show you what it does as far we trained it to to do uh what pick this one. Let's pick this one. So, so it takes every piece of it and scores it, right? Uh, and then it will also tell you what's missing and what a VC wants to
Alessandro De La Torre: All I see is why this is
Fred Cary: see.

Alessandro De La Torre: powerful.
Fred Cary: Wait a minute. Let me stop. Oh, here. There. Can you see it now? Can you the see the one I asked it to review the deck?

00:48:46

Alessandro De La Torre: Yeah.
Fred Cary: Hello.
Alessandro De La Torre: Yes.
Fred Cary: Anybody home?
Julian Bradley: Yeah.
Alessandro De La Torre: Hello chicken.
Fred Cary: You can see it.
Alessandro De La Torre: Hello. Yes.
Fred Cary: Okay. All right. So, I gave it the deck to review. It already knows all the things, right, to look at uh these are the elements. problem clarity, market size, solution differentiation, traffic proof, team credibility, business model defensibility, financial realism, fund raise clarity, and overall investability. So, it takes each one. So, problem clarity, right? It goes through it, identifies blah blah blah, and then it talks about what's missing, talks about what VCs want to see, and it gives an example improvement. This could be one of the payw walls where it gives you a summary of these kind of things and said, do you want us you want us to rewrite your deck for you? And it will it will actually do do that,
Alessandro De La Torre: Let
Fred Cary: right? Here's the market opportunity scores that and it tells you what's missing and why.

00:49:58

Fred Cary: Here's some examples. Uh the solution clarity again out of 10.
Alessandro De La Torre: me
Fred Cary: Um right and then
Alessandro De La Torre: just
Fred Cary: traction what's missing the team defensibility business model projections and then the bottom oops it gives you the overall assessment uh and then it gives you a

total readiness a score. Uh, and by the way, everybody that we're bringing up to Palo Alto on t Tuesday all have a 90 out of 100. So, it takes all that that knowledge and and then deck and it's been right now and it will make sure that we're kind of hitting the trigger on every one of these elements. Um, it will give us a deck. It's not really important now, but that's there it goes. Do you guys have 5.3 or use a different
Alessandro De La Torre: We're using the same like level of
Fred Cary: one?
Julian Bradley: Um, of the check I think it's like I don't think it's
Alessandro De La Torre: power.
Julian Bradley: 5.3.
Alessandro De La Torre: Are you using

00:51:53

Julian Bradley: Um,
Fred Cary: Yeah.
Julian Bradley: yeah.
Alessandro De La Torre: open
Fred Cary: Right. So it's already created a new deck with those slides. Uh and it follows this to make it investor grade. We should also add a visual visual diagram unit economics. Uh why this can't be replicated, right? And then it can it'll do it again for you. Um, but that's going to end up being really important. I mean, that's going to be the most critical piece at the end of the journey is now we're going to now that we have everything right and now you're going to have a perfect deck. And at the end of that, hopefully this guy I meet next week can plug in. But right now, we have a deal with with Bour. Plug Borty into the end of that and Bord will start making introductions to VCs.
Julian Bradley: Heat.
Fred Cary: uh at angels uh yeah on our behalf.
Alessandro De La Torre: on behalf.
Fred Cary: So we just have to go to we go into Bord and this is not scalable obviously right now

00:52:55

Alessandro De La Torre: Cool.

Fred Cary: manually we go to Bordy we say hey we're going to we're going to send you we're going to send you this
Julian Bradley: Heat.
Fred Cary: project here's a summary of it and they're going to contact you with this opening phrase then you just you tell the startup when here here's the phone number for Bordia on WhatsApp go there say this phrase and Bord will be waiting for you and
Alessandro De La Torre: You know, Fred, Bour, Borty does have an API, which means that we can actually just directly put Borty inside of Sahara and it,
Fred Cary: Oh,
Alessandro De La Torre: you know, and we're not like s******* on board.
Fred Cary: perfect.
Alessandro De La Torre: It's literally system. It's they're just talking through Sahara. So, you can have another tab on the bottom that's so you can talk to Fred and you can talk to
Fred Cary: Awesome.
Alessandro De La Torre: Bory.
Fred Cary: That's even better.
Alessandro De La Torre: Okay, cool.
Fred Cary: Okay.
Julian Bradley: Yeah.
Alessandro De La Torre: just wanted to get your unless the guy was like,

00:53:44

Fred Cary: All right.
Alessandro De La Torre: "No, no, no, no, no." You know what I mean? Like he was like,
Fred Cary: Yeah.
Alessandro De La Torre: "Oh, no.
Fred Cary: No, no,
Alessandro De La Torre: You have to talk on the WhatsApp or whatever." Okay,
Fred Cary: I actually negotiated with Bordy instead of a human and and Bour said, "All right,
Alessandro De La Torre: perfect.
Fred Cary: there's things I c I can do and there's things that we need to ask for humans." Um said, "All right, this is what I want to do." And oh, yeah, let's create that. We can do that. And just did the whole thing. Is a smart m**********. Um so anyway, I'll deal with this other guy. I'm going to I'm going to come up with a few slides I think we should

launch with. you know, just make sure that this is like you open it first and it gives us this is why we exist. This is what we're going to do for you. And then
Alessandro De La Torre: So yeah. So once again,
Fred Cary: just
Julian Bradley: Yeah.
Alessandro De La Torre: all that really needs to be done is the handholding aspect,
Fred Cary: Yeah.
Alessandro De La Torre: right? It just like we we're dropping them in the deep end.
Fred Cary: Yeah.
Alessandro De La Torre: Like we created something cool, but they don't know what the f*** they're looking at.
Fred Cary: Exactly. Exactly. Okay. All right, guys. You guys are awesome. I love you both.
